Roofing And More

Eco-Colours is a Roofing Brand established by the Zam-Zam Industries. We specialize in providing the complete roofing solution to your Industrial, Commercial or Residential Project.

Welcome to
Eco - Colours,

About Us

Build Strong. Build Durable.

A roof takes the toughest hit from the weather, making it a vital part of any building.

Choose a brand built for strength and long-lasting protection.

Company Where You Meet Quality...

With over **30 years of experience** in the roofing and construction material industry, Eco Colours has evolved into a trusted name known for quality, durability, and innovation.

In 2019, we established our own manufacturing facility, marking a major milestone in our mission to provide world-class roofing and structural solutions.

We are proud to be **officially associated with JSW Steel** as a distributor, tying a strong knot with one of India's most respected steel brands. Today, we stand among the largest and **fastest-growing distributors in Madhya Pradesh**, supplying premium materials to fabricators, contractors, builders, and industries across the region.

The advertisement features a red house with a blue roof, symbolizing the use of JSW Steel. The JSW Steel logo is prominently displayed at the top right. Below it, the text 'एक मजबूत विकल्प' (A Strong Alternative) is written in Hindi. The JSW Pragati+ logo is also shown, along with a '1 YEARS WARRANTY' badge. The text 'Colour Coated Sheets' is visible below the JSW Pragati+ logo.

Proud Distributor Of JSW Steel

Zam - Zam Industries

Profile Sheets

Strong. Stylish. Durable.

JSW Indradhanush

- Made from high-strength PPGL (Pre-Painted Galvalume) steel with superior corrosion resistance.
- Available in multiple thicknesses (commonly 0.35 mm to 0.50 mm) suitable for industrial and residential roofing.
- Features a trapezoidal high-rib profile for better load-bearing capacity and efficient water drainage.
- Coated with advanced paint technology for long-lasting, fade-resistant vibrant colours.

JSW Pragati+

- JSW Pragati Plus is a premium PPGL (Pre-Painted Galvanized Iron) roofing sheet known for high durability and value.
- Manufactured using galvanized steel with optimized Al-Zn And Primer coating, giving reliable corrosion resistance for long-term performance.
- Available in standard roofing thicknesses of 0.50 mm, ideal for residential, commercial, and light industrial applications.
- Prime Features consists 7-Year Warranty and AZ-70 GSM.

JSW Colour On+

- JSW Colouron Plus sheets are made from high-strength steel with 55% aluminium-zinc (Al-Zn) coating, giving superior corrosion resistance and long life even in harsh weather.
- They offer excellent yield strength (minimum ~ 550 MPa to 770 MPa), providing robust structural support for industrial and commercial purpose.
- Prime Features consists 15-Year Warranty and AZ-150 GSM

JSW COLOURON+ CR X.XX MM AZXXX P DD MM YY (ISI) 15965 BIS APPROVED

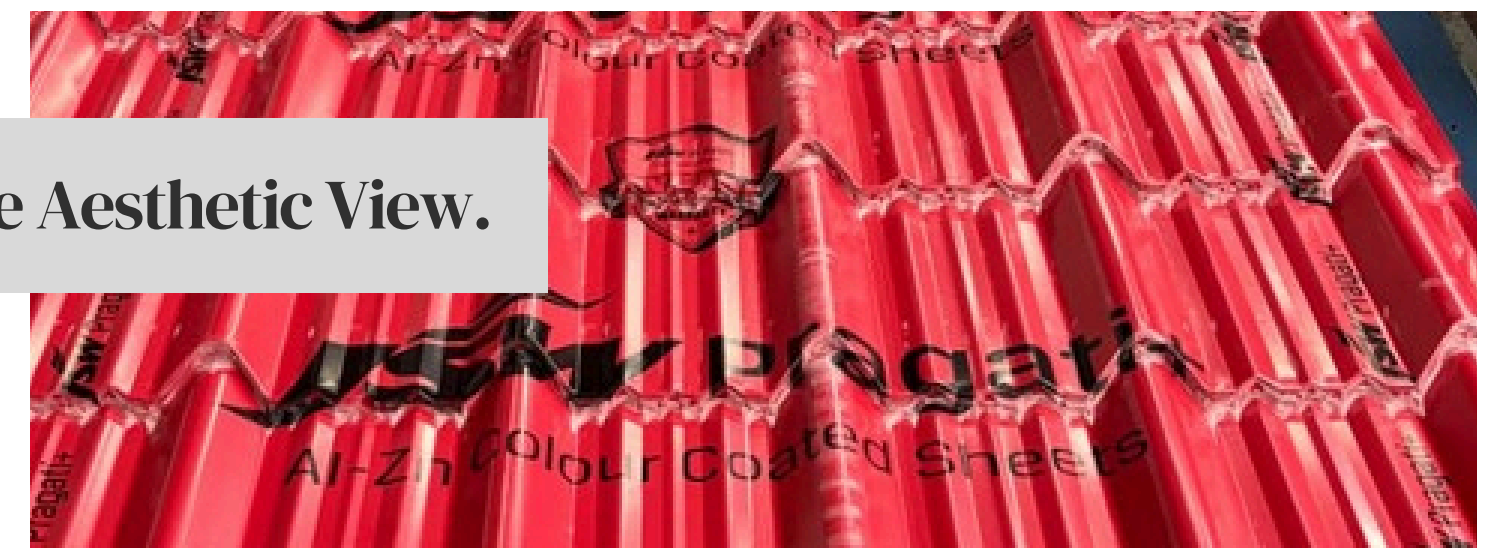

Mangalore/Bamboo

Give Your Home/Resort More Aesthetic View.

Bamboo Tile

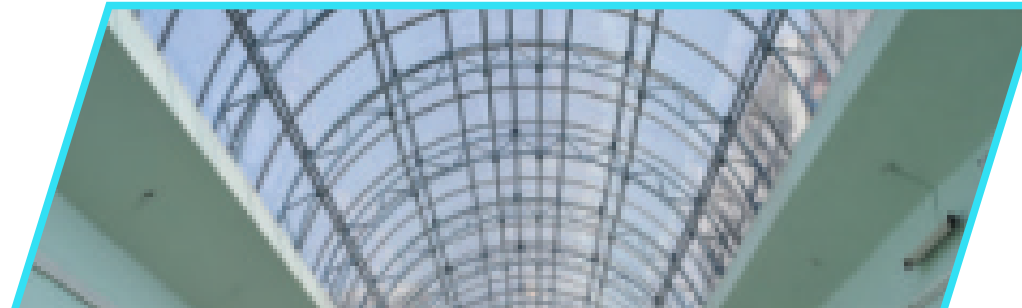

Bamboo Tile Roofing Sheets are premium roofing solutions designed to deliver the traditional look of clay tiles with modern strength. They offer excellent weather resistance, durability, and low maintenance, making them ideal for homes, resorts, and commercial buildings.

Mangalore/Kabelu Tile

Mangalore / Kabelu Tile Roofing Sheets are crafted to capture the authentic heritage look of conventional clay roofs with the strength and reliability of modern materials. They are built to withstand harsh weather conditions while remaining lightweight and easy to install.

Polycarbonate Sheet

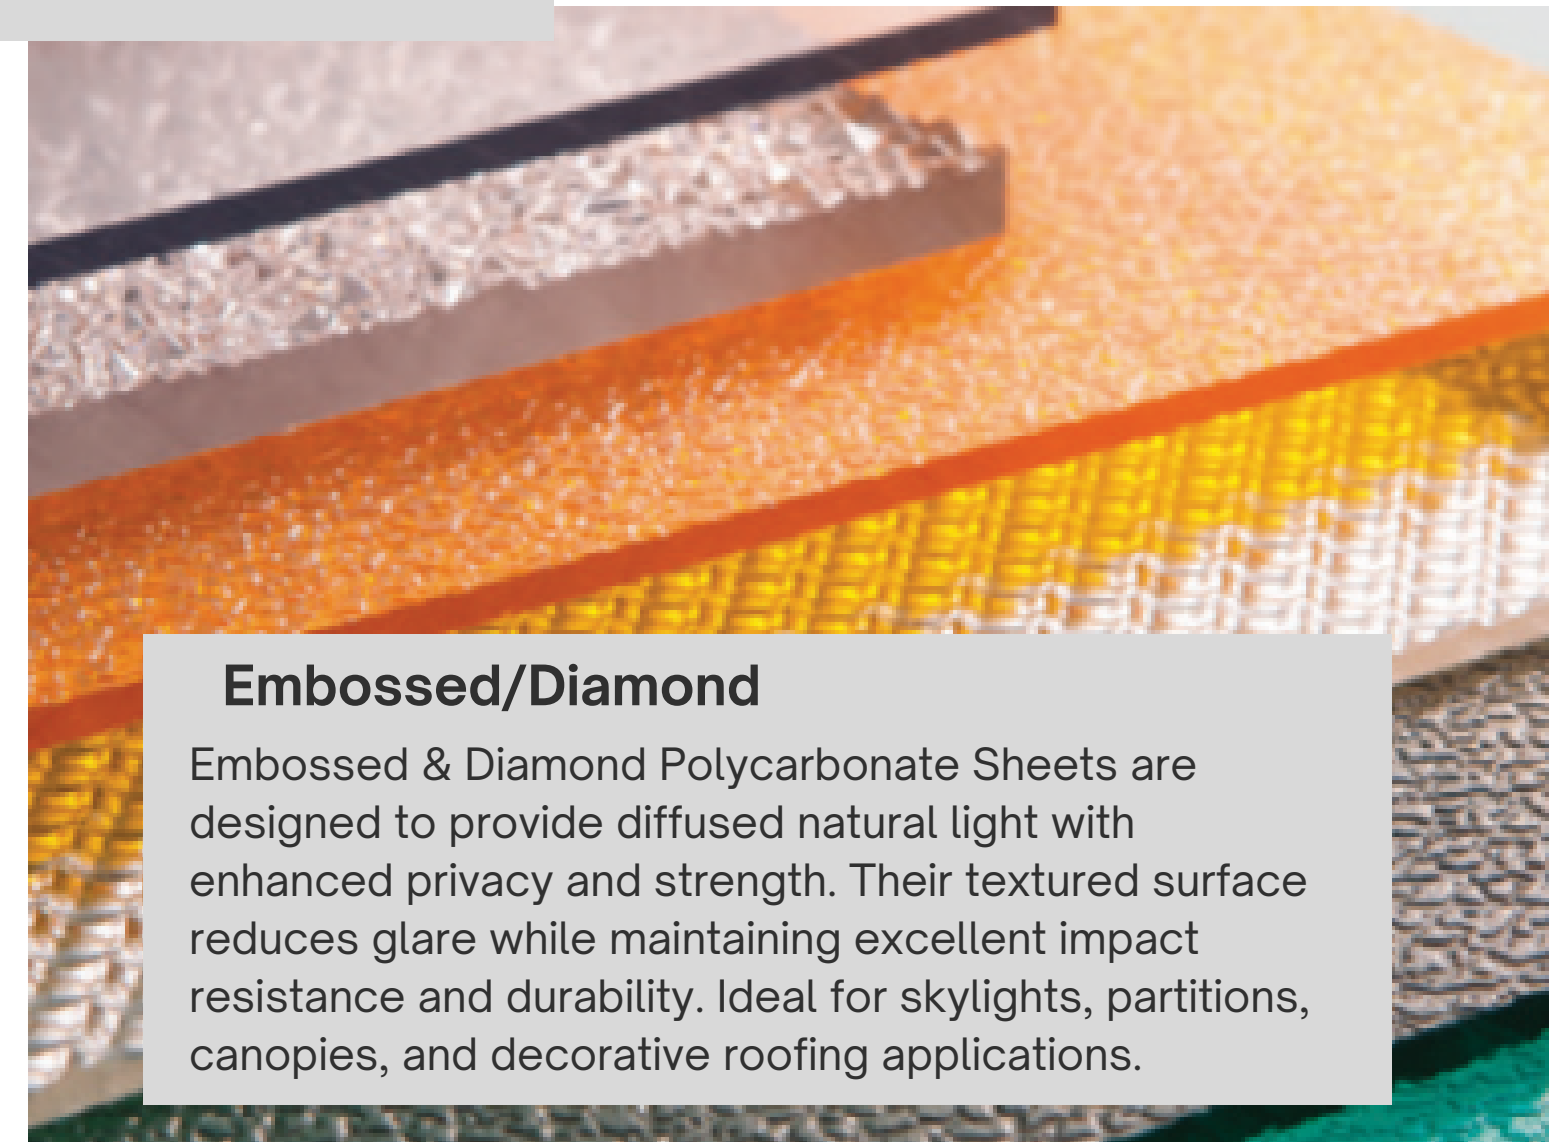

Give Your Home/Resort More Aesthetic View.

Clear Compact

Polycarbonate Clear Compact Sheets are high-strength, transparent roofing sheets that provide excellent light transmission with superior impact resistance. They are lightweight, UV-protected, and highly durable, making them ideal for skylights, canopies, walkways, and industrial roofing.

Embossed/Diamond

Embossed & Diamond Polycarbonate Sheets are designed to provide diffused natural light with enhanced privacy and strength. Their textured surface reduces glare while maintaining excellent impact resistance and durability. Ideal for skylights, partitions, canopies, and decorative roofing applications.

Roofing Where Strength
Along With Beauty.

Zam - Zam Industries

Stone Coated Tiles

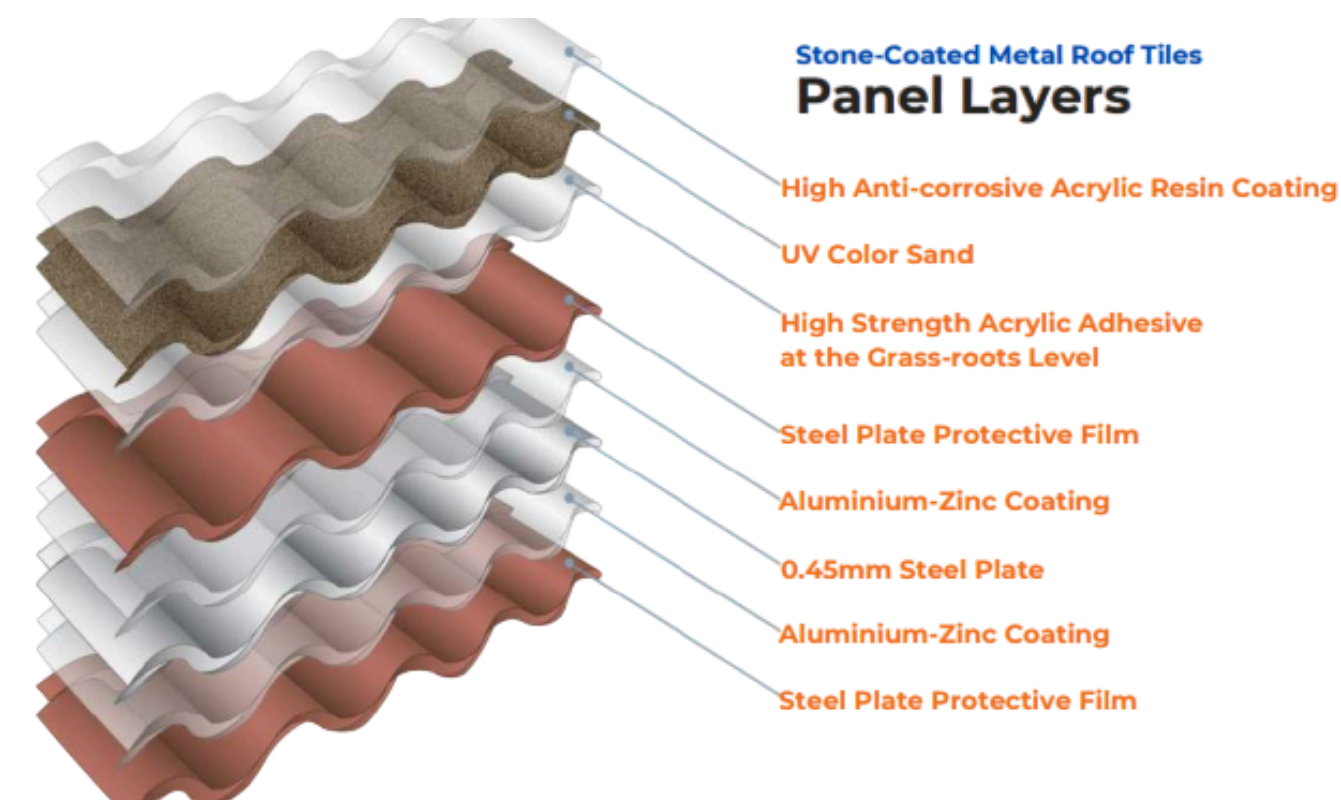

In today's world, homes and buildings are not just about functionality—they're about making a statement. Stone-coated roofing sheets offer the perfect combination of durability, cutting-edge design, and environmental harmony.

Stone Coated Tiles

“Breathe Easy — Let Wind Do the Work.”

A turbine ventilator is a roof-mounted ventilation device that uses wind (or natural air movement) to draw out hot, stale, humid, or polluted air from inside a building — replacing it with fresh outside air.

- **Energy-Free Operation:** Works entirely on wind or natural convection.
- **Better Air Quality & Comfort:** Continuously removes hot air, moisture, fumes, dust or stale ai
- **Temperature & Humidity Control:** Helps reduce indoor heat buildup, lowers humidity, and stabilizes temperature
- **Low Maintenance & Long Life:** Simple, rugged design with minimal parts; built to withstand weather and work 24×7 wit
- **Cost-Effective & Eco-Friendly:** One-time installation, no running costs for electricity
- **Versatile Use:** Suitable for residential houses, warehouses, factories, commercial buildings.

Turbine Ventilators

XLPE Insulation

Power. Performance. Protection — Meet XLPE Insulation

XLPE (Cross-Linked Polyethylene) is a specially engineered form of polyethylene where the polymer chains are chemically “cross-linked” to form a three-dimensional mesh. Unlike regular polyethylene, this cross-linking has

- Resistance to heat, moisture, and chemicals, making it ideal for use in HVAC systems, pipes, and electrical insulation applications.
- It is available in 6MM to 18MM.
- XLPE Insulation Sheets help enhance energy efficiency, reduce heat loss, and provide sound insulation, ensuring long-lasting performance in both residential and industrial settings.
- It has withstanding Temperature limit of -40 degree C to +115 degree C.
- Compact, cross-linked structure — won't melt or deform under stress.
- Because of its resilience and stable properties over time (heat, moisture, stress), it tends to last decades with minimal degradation — reducing maintenance or replacement costs.

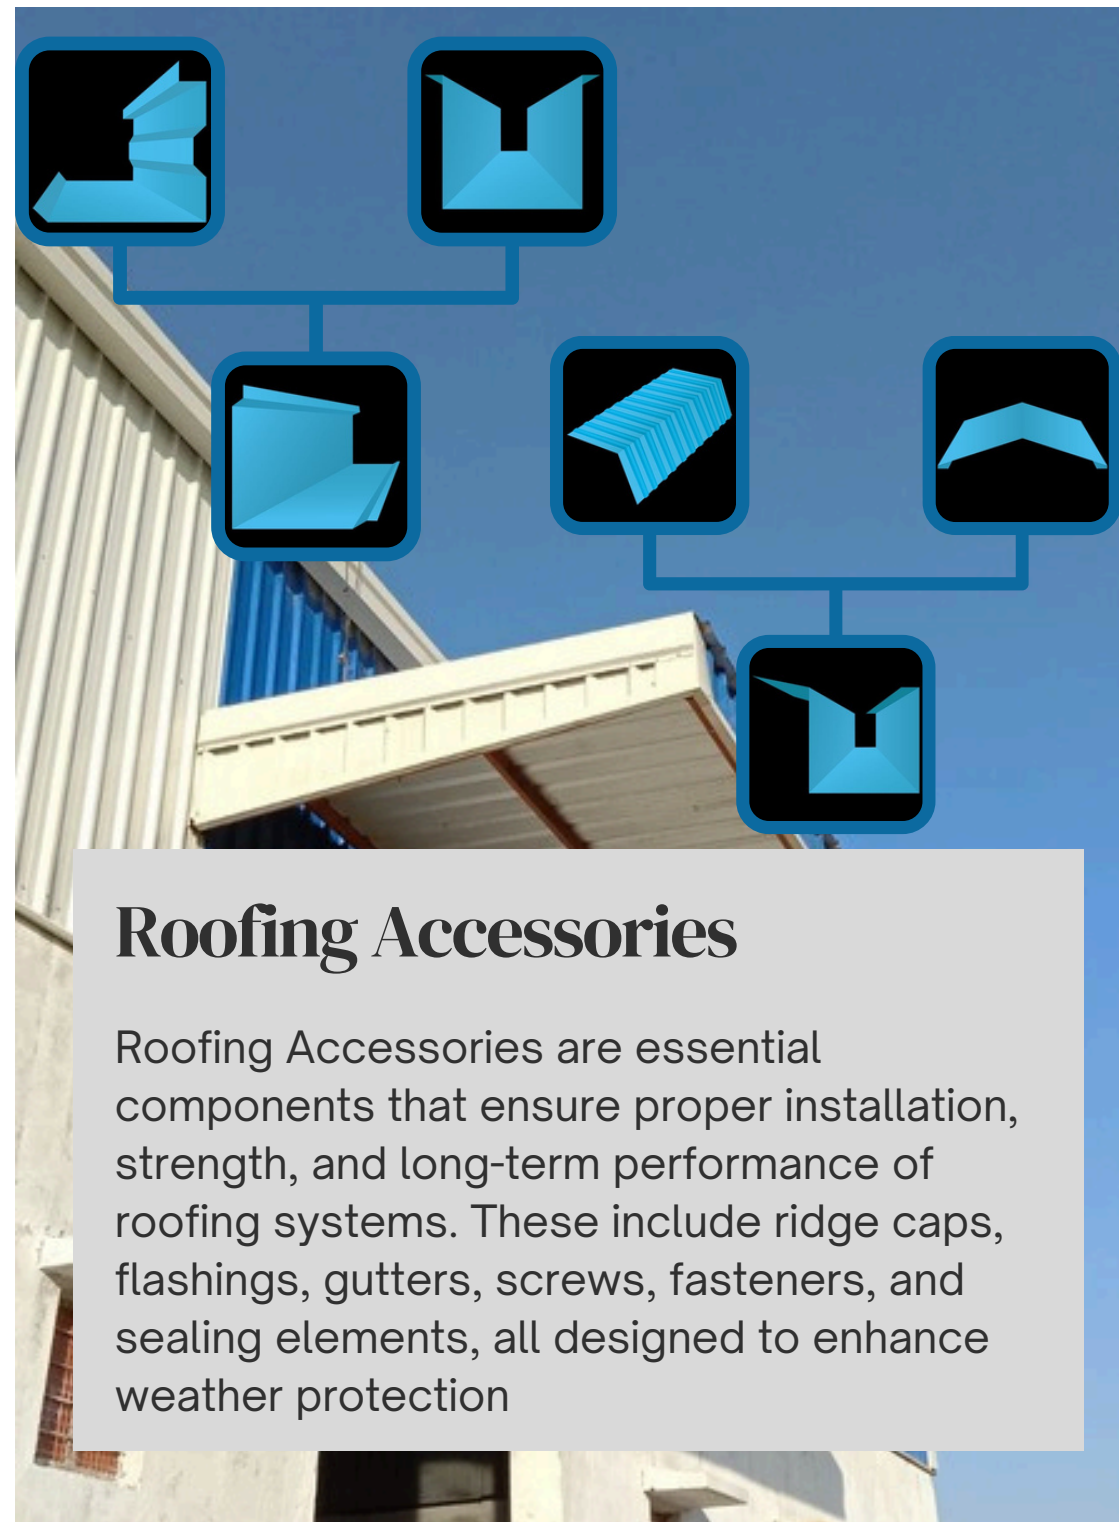

Customized Services

Zam - Zam Industries

Crimping Sheet

Crimping Roofing Sheets are specially designed for curved and arched roofing structures, offering flexibility without compromising strength. Manufactured with precision, these sheets provide excellent load-bearing capacity, weather resistance, and long service life.

Roofing Accessories

Roofing Accessories are essential components that ensure proper installation, strength, and long-term performance of roofing systems. These include ridge caps, flashings, gutters, screws, fasteners, and sealing elements, all designed to enhance weather protection.

Pipe Bending Service

Pipe Bending Services provide precise and accurate bending of MS pipes to meet custom structural and fabrication requirements. Using advanced bending techniques, this process ensures smooth curves, uniform angles, and maintained pipe strength without deformation.
